

## **Norman Kyle, R.E.T., P.L.(Eng)**

Since graduating from Civil Engineering Technology (Municipal/Water Resources) at Lethbridge Community College in 1986, I have worked for a variety of consultants, contractors, and two levels of government. This has given me insight into the issues facing technicians in different areas. This has also allowed me to work with a large number of technologists and technicians in varying capacities and disciplines. I have been certified since 1990 with OACETT and since 1995 with ASET. I obtained my R.E.T. designation in 2005 and my Professional Licensee (Eng) with APEGGA in 2009.

I have served as an ASET councillor since 2008, and served almost 12 years as a Chapter Chair in both Grande Prairie and Yellowknife.

My current employment with Alberta's first regional utility operator (Aquatera Utilities Ltd) has allowed me to interact directly with the development, consulting, and contracting businesses on numerous issues, giving me a greater appreciation of long-term planning and goal setting.

Additionally, through my most recent work with both the City of Grande Prairie and Aquatera, I have received recognition for both dedication and implementation of existing and new technologies.
