Story type Brief

A St. Albert engineering technologist has won an Alberta award for his work on a project to bring solar powered Internet access to developing nations.

The Association of Science and Engineering Technology Professionals of Alberta (ASET) announced Dec. 14 St. Albert resident Spencer Tracy and his teammates at the Northern Alberta Institute of Technology won this year's Capstone Project of the Year Award.

Speaking to The Gazette in November, Tracy said he and teammates Jacob Maxwell, Natasha Bergstrom-Baier, Abdallah Farah, and Steven Sager demonstrated how a portable solar array and

battery system could combine with the Starlink satellite network to bring Internet access to remote communities for under \$10,000.

The award consists of a trophy and bragging rights.
